- Golden Paintworks Slow Dry
Fluid Acrylic in Carbon Black,
Raw Umber and Yellow Ochre
- Aluminum Powder
- Regular Paints: SW Alabaster

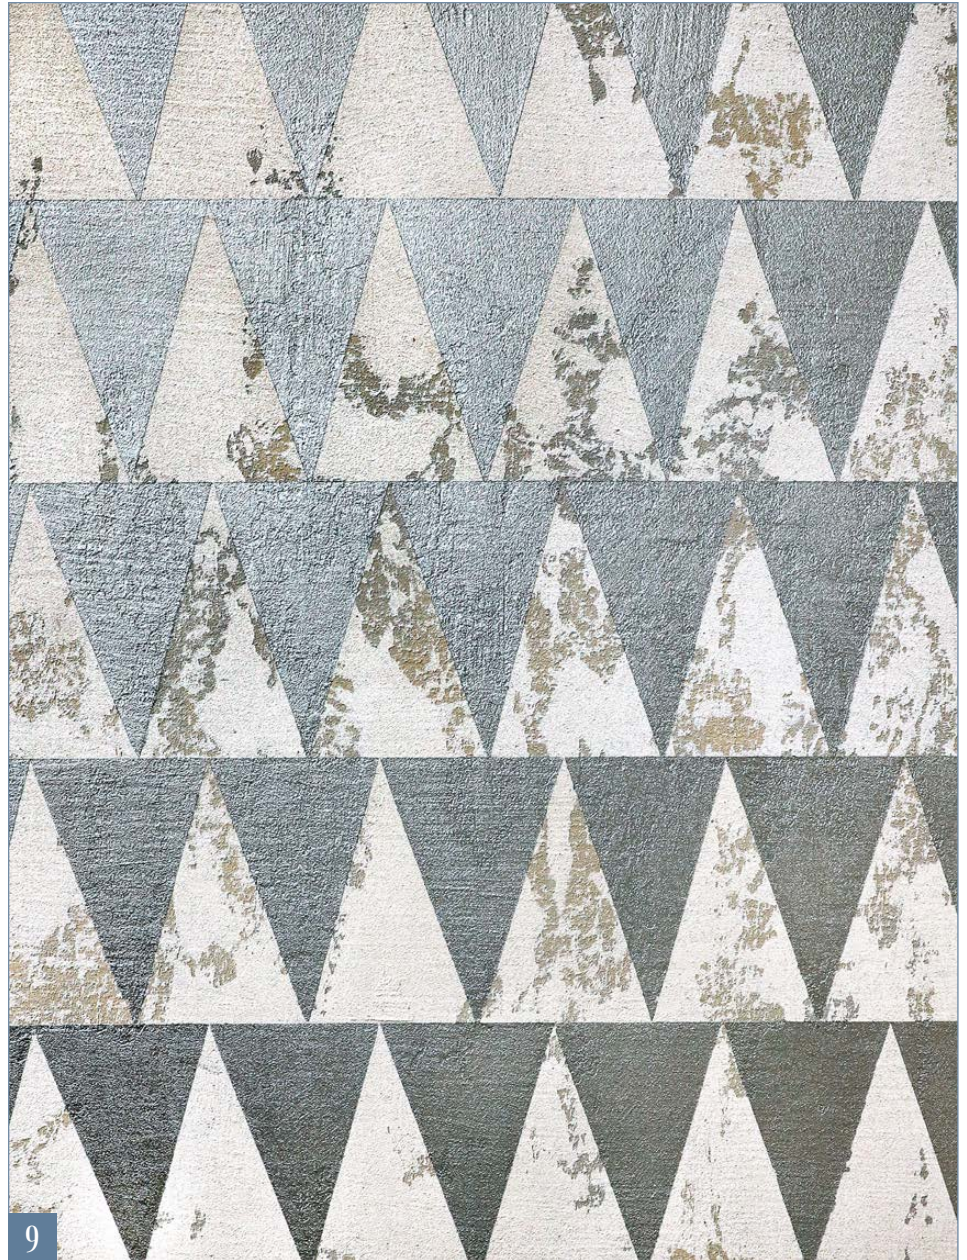

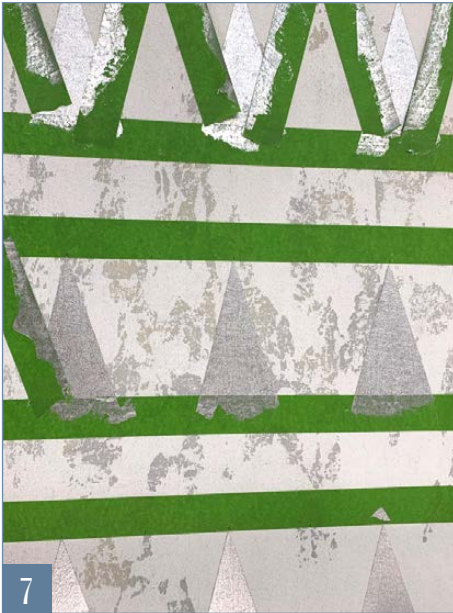

TOOLS

- Flexible Plastic
Japan Trowel
- Spatula

- 1 | **BASECOAT** in white color of choice. SW Alabaster was used.
- 2 | **USE** the Slow Dry Fluid Acrylic colors Carbon Black, Raw Umber, Yellow Ochre and SOAPSTONE TEXTURE MIX (Soapstone Texture and Glass Bead Undercoat) to create two colors similar to SW Believable Buff and SW 7016.
- 3 | **TROWEL** on simultaneously the two colors of Soapstone Texture mix. Let dry (*Photos 1-2*).
- 4 | **LAYER** on a lighter mixture of the Soapstone Texture mix, leaving gaps to show the first layer underneath (*Photos 3-4*). Tinted to SW Believable Buff at 25% strength. I “buttered” my blade and tapped on plaster then scraped down to flatten. Add more as necessary until satisfied. Let dry (*Photos 5-6*).

5 | APPLY design. To create triangle motif, tape out design or use an adhesive stencil.

6 | MIX Glazing Gel with Metallic Silver paint and aluminum powder and trowel into taped-off areas (*Photos 7-8*). Here is the completed finish (*Photo 9*).
