

# WEATHERED WHITE GOLD

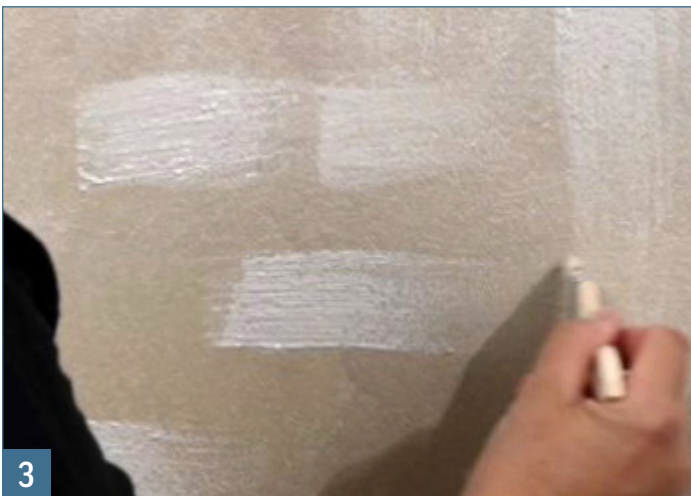

## Shiree Ingram | Decorative Finish How-To

### PRODUCTS

- White all-purpose primer
- Golden Paintworks Metallic White Gold
- Golden Paintworks Weathered Granite

### TOOLS

- Nappie winnie roller
- 2" chip brush

## HOW TO:

- 1 | Base paint with a white, high-hiding, all purpose primer.
- 2 | Using a nappy winnie roller, apply one coat of Golden Paintworks Metallic White Gold. Apply full coverage, rolling in a random pattern; for this application overlapping paint lines is not a concern. *(Photos 1-2)*
- 3 | Mix 1 part Golden Paintworks Weathered Granite with 1 part White Gold Metallic, then add 25% water. Using a 2" chip brush, apply random horizontal strokes, leaving open spaces to see the background. While these areas are wet, applying the same mixture in the same application, but apply strokes vertically. Work about a 3' x 3' space at a time. With this pattern, it's ok to leave and come back to this finish and begin again. *(Photos 3-4)*
- 4 | If necessary, after drying, touch ups could always be added to create more texture.

Here is the final finish. *(Photo 5)*
